DETAILED ACTION

Response to Amendment

Receipt of the Amendment, filed on January 6, 2009, is acknowledged.

Claims 1-19 are pending in the instant application.

Allowable Subject Matter

Claims 1-19 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of heating and baking the material layer formed on the substrate while maintaining the position of the second surface of the substrate entirely within the perimeter of the first surface of the second supporting bed wherein a difference between the third thermal expansion coefficient and the first thermal expansion coefficient is smaller than a difference between the second thermal expansion coefficient and the first thermal expansion coefficient.

Regarding claims 2-7, claims 2-7 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 8, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 8, and specifically comprising the limitation of a difference between the third thermal expansion coefficient and the first thermal expansion coefficient is smaller than a difference between the second thermal expansion coefficient and the first thermal expansion coefficient, and wherein the second supporting bed is configured such that when the substrate is placed on the second supporting bed the first surface of the

Art Unit: 2879

substrate touches the second surface of the second supporting bed, and the substrate is positioned entirely within the perimeter of the second surface of the second supporting bed.

Regarding claims 9-17 and 19, claims 9-17 and 19 are allowable for the reasons given in claim 8 because of their dependency status from claim 8.

Regarding claim 18, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 18, and specifically comprising the limitation of a distance between a center point of the substrate straddling the plurality of the second supporting beds and a thermal expansion center point of the second supporting beds is related to a thermal expansion coefficient of the substrate and a thermal expansion coefficient of the second supporting bed, and the relation is expressed by: $e < l / (2 \times (\text{difference in thermal expansion coefficient between the substrate and the second supporting bed}) \times T_f)$, where, e is the distance between the center point of the substrate and the thermal expansion center point of each of the second supporting beds, and T_f is the baking temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
